All the sounds you've been hearing are from the CD called "Bug Music," which also came out simultaneously. But then the author began introducing some rather weird characters-- people who interact with insects in one way or another to produce entertainment. Bug Music is a thought-provoking celebration of the acoustic bonds between humans and our insect cousins. Jun06, Michellerateditdidnotlikeit. Philosophy of mind. David Rothenberg decided to investigate the resounding beats of cicadas, crickets, katydids, leafhoppers and water bugs in his unusual third foray into music made with and out of the animal world. Edit this record. HistoryofWesternPhilosophy.Nov 02, Shel Schipper rated it liked it Shelves: science-and-math.
