Alert me to new issues of Journal of Soil and Water Conservation. An alternative argument is that the way to "save the environment" and prevent famine is by using pesticides and intensive high yield farming, a view exemplified by a quote heading the Center for Global Food Issues website: 'Growing more per acre leaves more land for nature'. Singapore: Springer Singapore, ; p.

Strawberryfieldsforever?Source:FoodandAgricultureOrganization[]. Studies of the transition from hunter-gatherer to agricultural societies indicate an initial period of intensification and increasing sedentism ; examples are the Natufian culture in the Levantand the Early Chinese Neolithic in China. In subtropical and arid environments, the timing and extent of agriculture may be limited by rainfall, either not allowing multiple annual crops in a year, or Advances in Agronomy: 82 irrigation.

GreenwoodPublishingGroup.Indianapolis:HudsonInstitute.Furthermore the UNEP states that " methane emissions from global livestock are projected to increase by 60 per cent by under current practices and consumption patterns.
